EDUCATION : _____

Noida institute of Engineering and Technology, Greater Noida

08/2024

Bachelor of Technology – Computer science

12th from CBSE, Bulandshahr

03/2020

PCM

OBJECTIVE: _____

Eager SQL Developer seeking a challenging entry-level role. Proficient in database design, querying, and optimization. Strong understanding of relational databases and SQL syntax. Possesses a keen analytical mind and a passion for data. Ready to contribute to efficient data management and problem-solving.

EXPREIENCE: _____

Process Associate | Genpact, [Noida, U.P]

May 2025 – Present

Executed high-volume transaction processing and rigorous data analysis, consistently ensuring 100% compliance with all SOPs and SLAs. Contributed to operational efficiency

PROJECTS: _____

Medi Care: Hospital Management Site for Hospital.

- Developed a website for hospitals to manage and engage with patients.
- Developed smooth routing using **React Routing**.
- Used **JWT** for patient authentication.
- Used server-side database **PostgreSQL** to store basic details of patients.

Bits and Biets: A Short news web Application.

- Developing a one-stop news application using the MERN stack is a versatile and impactful project idea.
 - Developed a dynamic web platform for concise news updates using Mern Stack, catering to users seeking quick and reliable information.
- Implemented a user-friendly interface for seamless navigation and efficient content consumption.
- Utilized React for frontend interactivity, **Node** and **Express** for backend functionality, and **MongoDB** for data storage, ensuring scalability and responsiveness.

SKILLS: _____

- Technical: Python (Pandas, NumPy), HTML, CSS, MySQL Microsoft Office (Excel, PowerPoint, Word), Java Programming, JavaScript, React, DBMS.
- Tools– Vs code, Git, MS Office etc.
- Soft Skills Time Management, Teamwork, Problem Solving, Documentation, Engaging Presentation, Ability to work on complex market projects.

ACHIEVEMENT: _____

Published a paper on the topic of deduplication of big data on cloud. This technique eliminates redundant encrypted data, saving storage and bandwidth. It maintains confidentiality while optimizing resources, crucial for efficient and secure cloud storage solutions.

CERTIFICATE

- Hosting a Static Website (HTML/CSS / JAVASCRIPT) in AWS S3
- Developing Cloud Apps with Node.js and React.
- Object Oriented Programming in Java
- Reliable Google Cloud Infrastructure: Design and Process.
